

# Report from the Institute Board

**Frank Simon**  
**Max-Planck-Institut für Physik**  
**Munich, Germany**

***CLICdp Workshop, CERN, June 2014***

# The first IB Meeting of a “New Age”

---

- For the first time: No work on MoC annexes, no appointments of new working groups / boards
- ▶ CLICdp has reached a somewhat mature state - now a stable, running collaboration

# The first IB Meeting of a “New Age”

---

- For the first time: No work on MoC annexes, no appointments of new working groups / boards
- ▶ CLICdp has reached a somewhat mature state - now a stable, running collaboration
  
- CLICdp is still growing - Now 23 members:
  - Additions since last meeting (February 2014):
    - University of Bristol
  
  - Discussions with additional institutes ongoing

# Key Points at Today's Meeting

---

- CLICdp is getting more visibility on CERN pages
  - New webpage, listed in directory, in Grey Book,...
  - Now CLICdp teams for user registration - allows association of members in Grey Book - ongoing activity to move users
- It is important to “promote” the CLICdp identity:
  - When giving presentations: Mention CLICdp (and not various different variants such as CLIC Detector and Physics, ...)
  - Investigating the possibility of a CLICdp logo - based on CLIC logo, but somewhat different
- Preparations for AIDA2020 ongoing - Submission of proposal in early September
  - CLICdp institutes (and CLICdp related activities) represented in several work packages
- Regional LC Workshops
  - At present two workshops per year, one LCWS, one regional - Discuss changing the format of the regional workshop - Towards coordinated collaboration / concept meetings rather than another LCWS copy?
