

# Ions: Baseline, Studies Plan and Strategy for Pending Options

*Wednesday, September 24, 2014 12:05 PM (15 minutes)*

We will review the performance of the ion injector chain of the LHC during LR1, and the baseline of the upgrades, which are planned in order to reach the performance required after LS2. After overviewing the open issues and a tentative list of planned machine developments, we present the beam characteristics expected during LR2 and beyond.

**Presenter:** BODENDORFER, Michael Andreas
