

LA³NET

Scientists Go Industry

Helmholtz Association
Berlin, Germany
16-18 November 2014

The aim of the event is to give an overview of possible future career steps in industry for young scientists from the laser and acceleration field. By bringing together potential future employers in industry with young researchers, the event will help to identify and solidify interesting future prospects for both sides. Talks will give insight into the companies and how R&D is done there.

The event is open for external delegates and is particularly interesting for any young researcher that wants to explore future career possibilities in this field. Besides the talk sessions several social events like a reception and common dinner will give further opportunities for networking.

Contact and further details:

M. Sc. Jurjen Couperus
LA³NET fellows' spokesman
Laser Particle Acceleration Division
Helmholtz-Zentrum
Dresden-Rossendorf (HZDR)
j.couperus@hzdr.de

Prof. Dr. Carsten P. Welsch
Associate Director
Cockcroft Institute
Sci-Tech Daresbury
University of Liverpool
Warrington WA4 4AD, UK
carsten.welsch@cockcroft.ac.uk

Registration:

Between 7 July 2014 and 15 October 2014.
Scholarships for young researchers will be available.
