What a user expects from a graphical interface ?

- a toolkit, easy to use, which allows him to built his own interactive Geant4 application
  - easy = by non-expert

- remark 1 : an interactive application include necessarely visualization and analysis tool

- remark 2 : the graphical interactive mode must be compatible with more 'classical' approach : commands line or batch
  - Compatibility of libraries

- remark 3 : the toolkit itself must be easy to install
