

# Hadronic Group Organizational Meeting

Aatos Heikkinen, HIP

October 12, 2006

# Agenda

- G4NDL Use Restrictions and Policy (15')
- Review of Two Coordinator Concept (20')
- Action items (35'):
  - Shower shapes
  - Isotope selection issue
  - Preparing for Geant4 review

## Review of Two Coordinator Concept

We (Dennis and Aatos) propose to Geant4 hadronics working group (WG), that we continue two coordinator approach.

- Dividing organizational workload is the key benefit

Attacking known problems:

- Improving internal WG communication
  - More intensive use of WG -page:  
[http://geant4.web.cern.ch/geant4/collaboration/working\\_groups/hadronic](http://geant4.web.cern.ch/geant4/collaboration/working_groups/hadronic)  
to follow progress
  - Should we start using Wiki-page?
    - Responsible persons could update material directly
- Balancing workload more evenly and clarifying responsibilities
  - AH starts organizing WG meetings and take responsibility of progress report requests and updates
  - We use WG -page to clarify in more detail the responsibilities (See for example the list of model responsibilities)
