

Session Program

12-14 Nov 2014

**The 2014 Kyoto Workshop on HTS Magnet
Technology for High Energy Physics - The 2nd
Workshop on Accelerator Magnet in HTS
(WAMHTS-2) -**

HTS Test Coils

Friday 14 November

11:00

HTS Test Coils

Session | **Location:** Katsura Campus of Kyoto University, Katsura Hall | **Convener:** David Larbalestier

11:00-11:20

Bi-2212 round wire processed with over-pressure for accelerator magnet applications

Speaker

Maxime Matras

11:20-11:40

Recent progress towards high field magnets using Bi-2212/Ag-alloy multifilament round wire

Speaker

Peng Chen

11:40-12:10

Recent progress of coil applications using DI-BSCCO wires at Sumitomo Electric

Speaker

Kazuhiko Hayashi

12:10-12:40

Recent progress in R&D of REBCO coated conductors and coils at Fujikura

Speaker

Masanori Daibo

12:40-13:10

YBCO high temperature superconducting coil development for various applications at Toshiba

Speaker

Kenji Tasaki

13:10
