

pre-GDB on Batch Systems

Report of Contributions

Contribution ID: 0

Type: **not specified**

Introduction

Tuesday, 12 May 2015 10:30 (10 minutes)

Contribution ID: 1

Type: **not specified**

BDII publication

Tuesday, 12 May 2015 12:00 (30 minutes)

BDII use cases

GIP development needs ? How/who?

Contribution ID: 2

Type: **not specified**

Wrap-Up

Tuesday, 12 May 2015 16:50 (10 minutes)

Further coordination

Contribution ID: 3

Type: **not specified**

Initial configuration and monitoring

Tuesday, 12 May 2015 14:00 (30 minutes)

Interaction with MW
Security: account mapping
Accounting groups/fair-share
Python bindings

Session Classification: HTCondor

Contribution ID: 4

Type: **not specified**

Memory limitation

Tuesday, 12 May 2015 14:30 (30 minutes)

Session Classification: HTCondor

Contribution ID: 5

Type: **not specified**

Multicore jobs

Tuesday, 12 May 2015 15:00 (30 minutes)

Draining: defrag daemon, DrainBoss...

Backfilling: status of passing job parameters

Session Classification: HTCondor

Contribution ID: 7

Type: **not specified**

ARC an HTCondor CE

Tuesday, 12 May 2015 15:50 (40 minutes)

Session Classification: CE: alternative to CREAM

Contribution ID: 8

Type: **not specified**

Accounting

Tuesday, 12 May 2015 16:30 (20 minutes)

New CE issues with APEL accounting
Direct publication vs. APEL box
CERN approach

Session Classification: CE: alternative to CREAM
