University of Wisconsin Madison CMS T2 site report

Monday, 13 October 2014 11:15 (15 minutes)

As a major WLCG/OSG T2 site, the University of Wisconsin Madison CMS T2 has provided very productive and reliable services for CMS MonteCarlo production/processing, and large scale global CMS physics analysis using high throughput computing (HT-Condor), highly available storage system (Hadoop), efficient data access using xrootd/AAA, and scalable distributed software systems (CVMFS). An update on the current status of and activities (since the last report at Ann Arbor meeting) at the UW Madison Tier-2 will be presented that includes efforts on the 100Gb network upgrade and IPv6 etc., among other things.

Summary

An update on the current status of and activities (since the last report at Ann Arbor meeting) at the UW Madison Tier-2 will be presented that includes efforts on the 100Gb network upgrade and IPv6 etc., among other things.

Primary authors: MOHAPATRA, Ajit (University of Wisconsin (US)); Dr VUOSALO, Carl (University of Wisconsin (US)); BRADLEY, Daniel Charles (University of Wisconsin (US)); Prof. DASU, Sridhara (University of Wisconsin (US)); SARANGI, Tapas (University of Wisconsin (US))

Presenters: MOHAPATRA, Ajit (University of Wisconsin (US)); SARANGI, Tapas (University of Wisconsin (US))
