First Experience with the Wigner Data Centre

Wednesday, 15 October 2014 14:00 (30 minutes)

After a tender for a CERN remote Tier0 centre issued at the end of 2011, and awarded to the Wigner Data Centre in May 2012, operations commenced at the beginning of 2013. This talk will give a brief introduction to the history of this project and its scope. It will then summarise the initial experience that has been gained to-date and highlight a number of issues that have been encountered; some maybe expected but others not.
