Grid Web portal for chemists – status of development

Monday 22 September 2008 18:30 (20 minutes)

New Grid users often face difficulties when using command line interface. This makes their adoption in the Grid environment much harder. To avoid user's disappointment new, web based, interface is proposed. In contrast to existing web based tools portal will not only easy job management but in first place will serve as a work environment for chemists. The talk will present current status of development of portal with plug-in to Gaussian suite.
