Operations Automation Strategy

Thursday, 25 September 2008 14:05 (45 minutes)

This talk outlines the rationale for having an operations automation strategy, and then defines the strategy in considerable detail. This strategy is being implemented during the lifetime of the EGEE-III project. It was created by experts representing the core EGEE operational tools, as well as representatives of the regional and grid-wide operations team, and the site management community.

Presenter: CASEY, James (CERN)

Session Classification: EGEE Operations (2)
