Open Discussion: Status of the Astrophysical Cluster in EGEE

Tuesday, 23 September 2008 11:30 (1 hour)

This discussion will be centered on topics listed in the parallel session abstract. The objective is to clearly take a bearing of the cluster status aiming mainly at identifying and removing potential issues that could prevent or make more difficult the achievement of cluster's objectives. The discussion topics are listed here:

- a) level of interactivity within the cluster;
- b) status of the application porting activity;
- c) issues met so far during the gridification process;
- d) tools and services used during the gridification process; e) requested tools and services still missing.

Session Classification: Astronomy/Astrophysics Community Meeting
