

Status report on Application porting at SZTAKI

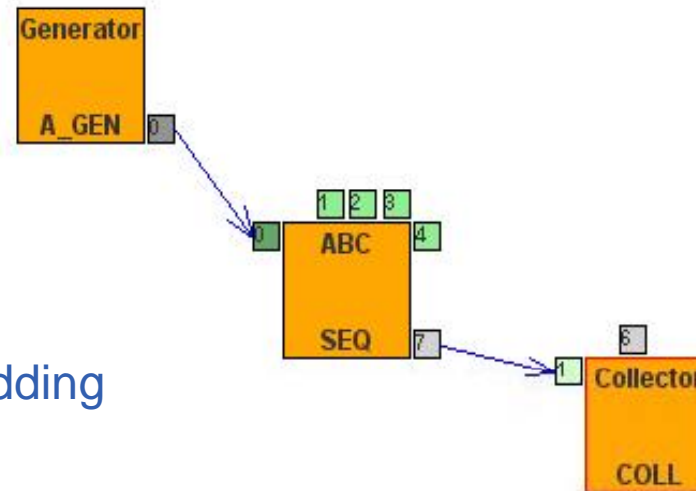

Author: Gergely Sipos, Ákos Balaskó
MTA-SZTAKI

sipos@sztaki.hu, balasko@sztaki.hu

Date: 04/06/2008

- **ABC** and **RWavePR** (from University of Perugia, Italy)
 - Computational Chemistry cluster
 - Storage I/O files registered in LFC
 - Parametric job
 - Workflow in P-GRADE
- **EMMIL** (from International Business School, Hungary)
 - Large number of jobs – clustering to minimize Grid submission overhead
 - Custom Web portal interface in Gridsphere
 - Grid execution engine from P-GRADE
- See more at www.lpds.sztaki.hu/gasuc

- Type of program:
 - Sequential Fortran code, multiple data
- Used VO:
 - COMPCHEM
- Used existing tools:
 - P-GRADE Portal 2.7
 - Autogenerating mechanism to generate set of input files by adding variables, and values' interval.
 - Workflows
 - Remote File Management
- Type of solution for porting:
 - Parameter Study
- Difficulties under development:
 - No program developed to collect data.
- Solution:
 - Develop a script to do this.

ABC_PS_COMPCHEM_AGEN.6	running	N/A	Details	Suspend Abort
ABC_PS_COMPCHEM_AGEN.7	submitted	N/A	Details	Suspend Abort
ABC_PS_COMPCHEM_AGEN.8	running	N/A	Details	Suspend Abort
ABC_PS_COMPCHEM_AGEN.9	running	N/A	Details	Suspend Abort

Jobs in collector phase

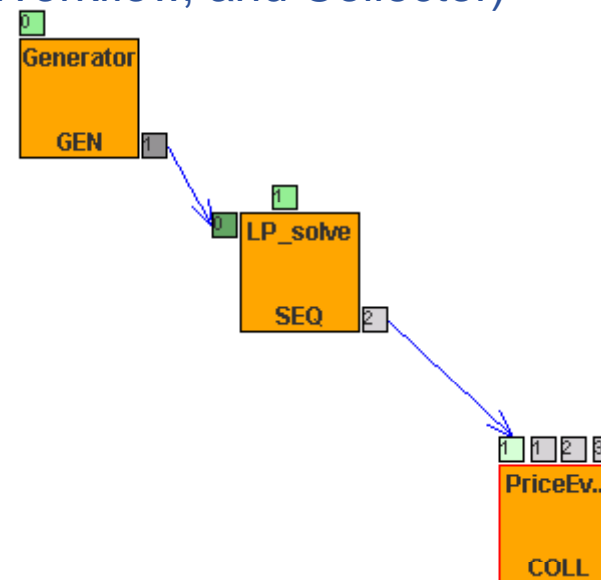

Job	Status	Type	Gridname	Hostname	[Logs]
Collector	init	collector	compchem_LCG_2_BROKER	unknown	---

June 5, 2008

- Type of program:
 - Sequential Fortran code, multiple data
- Used VO:
 - COMPCHEM
- Used tools:
 - P-GRADE Portal 2.7
 - Autogenerating mechanism to generate set of input files by adding variables, and values interval.
 - PS-Workflow management
 - Remote File Management (LFC Catalog)
 - LCG-2 Brokering
- Type of solution for porting:
 - Parameter Study
- Difficulties under development:
 - No program developed to collect data.
- Solution:
 - Develop a script to do this.

- Type of program:
 - 3 Sequential C program (as Generator, e-Workflow, and Collector)
- Used VO:
 - SEE-GRID
- Used tools:
 - P-GRADE Portal 2.7
 - PS-Workflow management
 - Remote File Management (LFC Catalog)
 - LCG-2 Brokering
- Type of solution for porting:
 - Workflow with Parameter Study
- Difficulties under development:
 - Developing a new portlet as user interface, where users can add inputs, and can see results.
 - Developing script to do workflow generalization, and submission automatically.

Formatted Directions

804 km (about 10 hours 39 mins)

- Head west 7.2 km
- Turn left at 18 9.2 km
- Turn right at 1/6/E79/E871 (signs for Kulata/Kulata/1/E79) 14.1 km
- Take the exit toward Kulata/Kulata/Dupnitsa/Дупница 0.3 km
- Merge onto 1/E79 Entering Greece 156 km
- Continue on E79 38.2 km
- Turn right at 12/E79 Continue to follow 12 64.9 km
- Take the ramp to 0.0 km

Map

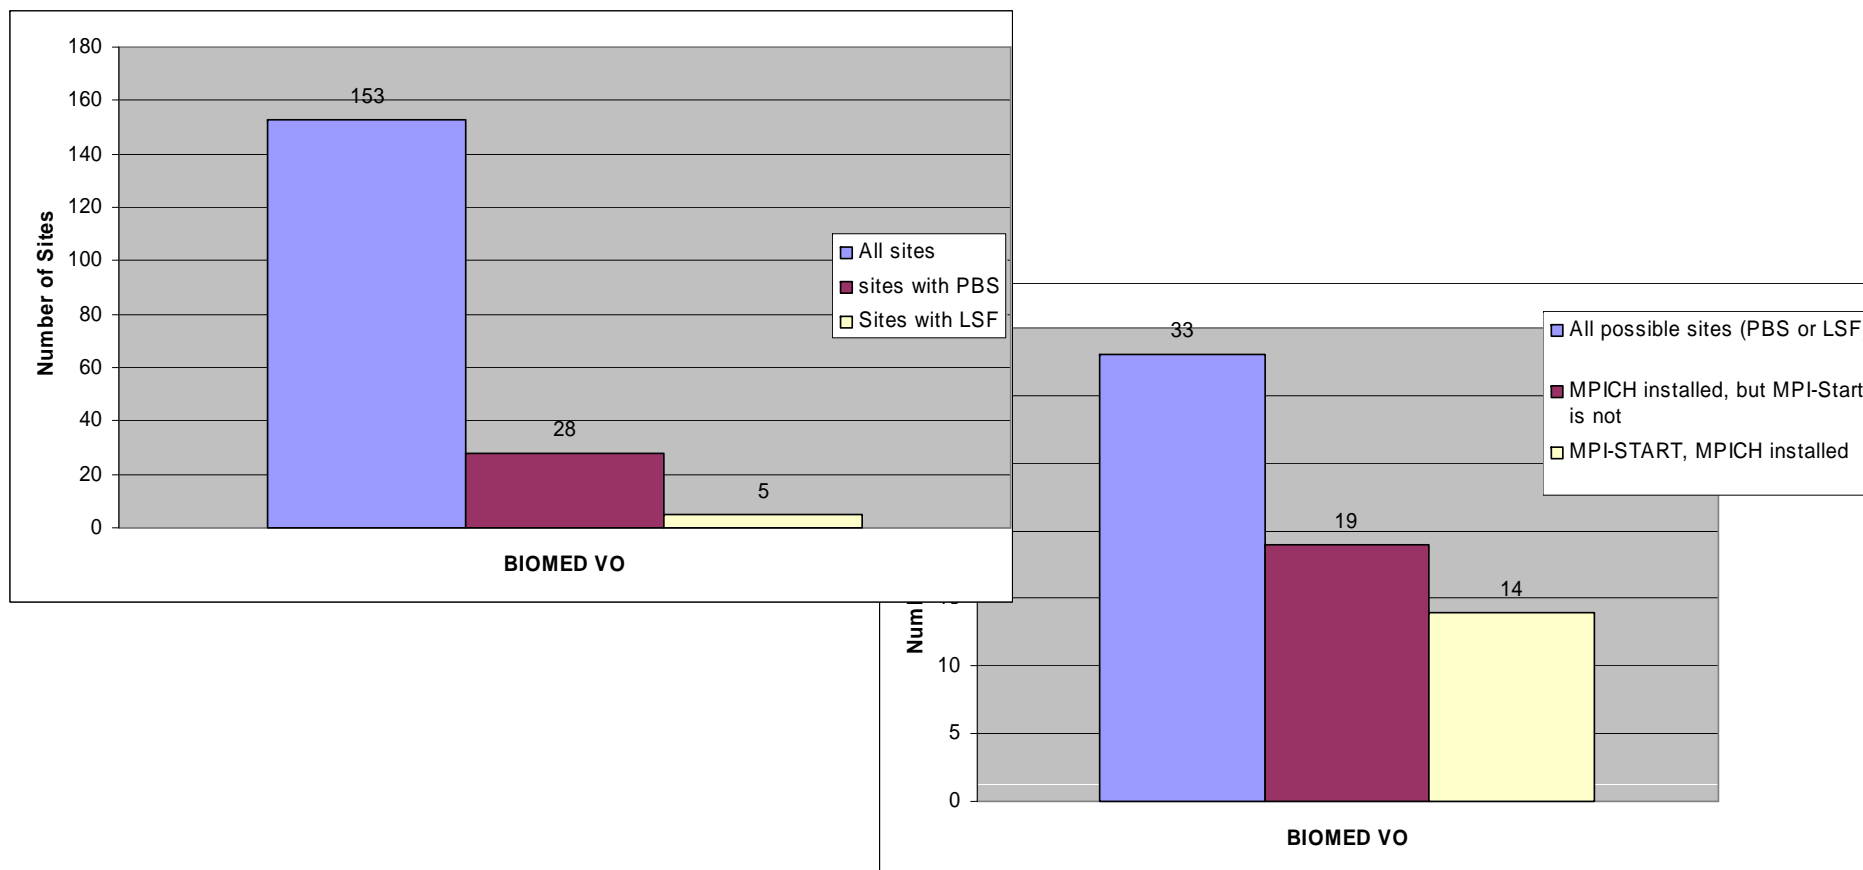

Current applications:

- **SIMRI 3D** (from Sorina Camarasu, CNRS CREATIS-LRMN, France)
- **MPI-FD_FDTD** (from Fumie Costen, University of Manchester, United Kingdom)
- **Cortial networks** (from John M. Beggs, Indiana University)

- Sorina Camarasu (Life sciences)
- Type of program:
 - Sequential C with MPI
 - Needs high-level user friendly interface
 - MPI code might be replaced with other code in the future
- Used VO:
 - BIOMED
- Difficulties of porting:
 - Supporting MPI on many sites
 - Using modified (argument parser) wrapper scripts and tar-ball downloadable from EGEE MPI webpage
 - Extend P-GRADE with custom GUI vs. Extend similar portal with Grid execution engine?
 - We work on option 1, owner works on option 2

- Existing Problem:

- Only very few sites in Biomed are available for MPI (21%), because only PBS and LSF managers supports MPI
- MPICH must be installed at least, to be able to run MPI code

- Fumie Costen (Uni of Manchester)
- Type of program:
 - Fortran with MPI
- Used VO:
 - BIOMED
- Used tools:
 - Command line tools (lcg-*, glite-wms commands) on BIOMED UI
- Difficulties of porting:
 - Same as earlier
 - One execution generates so many small files that WN cannot deal with it
 - Developing a script that copies each output files to an SE separately, saves LFN into a log file, delete local file.
 - Modify source code to use script for file upload
 - .

- John M. Beggs (Indiana University)
- Type of program:
 - C with MPI, MATLAB
- Difficulties of porting:
 - Executing MATLAB code on grid
 - Solved?
