

Session Program

26-31 Jul 2015

**Second conference on heavy ion collisions in
the LHC era and beyond**

Electroweak Probes

Quy Nhon, Vietnam
International Center of Interdisciplinary Science Education (ICISE)

Tuesday 28 July

14:00

Electroweak Probes

Session | **Location:** Quy Nhon, Vietnam, International Center of Interdisciplinary Science Education (ICISE)

14:00–14:30

Recent developments in the theory of electromagnetic probes in relativistic heavy-ion collisions

Speaker

Dr Chun Shen

14:30–15:00

Electroweak Bosons in Heavy Ion Collisions with the ATLAS Detector

Speaker

Qipeng Hu

15:00–15:30

Electroweak boson results from CMS

Speaker

Thi Hien Doan

15:30–16:00

Coffee break

16:00–16:30

Measurements of W boson production in p-Pb collisions at the LHC with ALICE

Speaker

Kgotlaesele Senosi

16:30–17:00

Direct photon v_2 puzzle in heavy ion collisions

Speaker

Fu-Ming Liu

17:30

Friday 31 July

11:00

Electroweak Probes: Electroweak Probes

Session | **Location:** Quy Nhon, Vietnam, International Center of Interdisciplinary Science Education (ICISE)

11:00-11:30

Electromagnetic-field induced transports in heavy-ion collisions and cold atoms

Speaker

Xu-Guang Huang

11:30
