

# CAF status

Jan Fiete Grosse-Oetringhaus, CERN PH/ALICE

CUF, 24.04.08

# General Status

- Software updated on We, 17.00
  - More stability
  - Dataset functionality integrated
  - Log can be viewed from progress window in case of crash
  - LXPLUS version available together with v4-12-Release
- New version does not support AliRoot v4-04-Release
  - Was used for PDC06 data
  - Will be removed in 2 weeks together with the PDC06 data
  - Until then the old version is still available

# Staging

- Users can stage the files they want
  - Detailed procedure explained
    - at CUF on 27.03.
    - during the Offline weeks
    - on the CAF webpage
- Datasets are public
  - You can use datasets of anybody
  - You can agree with colleges which data to stage
  - Once data is used by many people it can be moved to the common area of the groups
- Questions?
