

DISCRETE 2014: Fourth Symposium on Prospects in the Physics of Discrete Symmetries

Contribution ID: 111

Type: **not specified**

B-physics with ATLAS and CMS

Thursday, 4 December 2014 17:30 (30 minutes)

The large production rates of heavy flavoured particles at the LHC provide excellent opportunities to test the standard model and probe for new physics effects. A review of selected recent measurements by ATLAS and CMS based on LHC Run I data is presented, along with prospects for coming LHC runs.
