

DISCRETE 2014: Fourth Symposium on Prospects in the Physics of Discrete Symmetries

Contribution ID: 70

Type: **not specified**

Discrete Symmetries in F-theory Model Building

Wednesday 3 December 2014 17:10 (30 minutes)

F-theory is known to admit a number of discrete symmetries, such as A_4 , D_4 and Z_N symmetries. An introduction to the methods involved will be provided, with a view to discussing current work in the field.

Author: MEADOWCROFT, Andrew (University of Southampton)

Presenter: MEADOWCROFT, Andrew (University of Southampton)

Session Classification: Parallel 14: Discrete Symmetries in Strings and in GUT theories
