

Session Program

2-6 Dec 2014

DISCRETE 2014: Fourth Symposium on Prospects in the Physics of Discrete Symmetries

***Parallel 2: Neutrinos mass and mixing,
implications for astroparticle physics, dark
matter searches***

King's College London, Strand Campus, Great Hall and several lecture theatres
Strand London WC2R 2LS UK

Tuesday 2 December

14:45

Parallel 2: Neutrinos mass and mixing, implications for astroparticle physics, dark matter searches

Session | Location: S 7.06 (7th floor Strand Bldg)

14:45–15:20

Neutrino Astrophysics : recent advances and open issues

Speaker

Dr CRISTINA VOLPE

15:20–15:55

Dynamical generation of fermion mixing

Speaker

Massimo Blasone

15:55–16:25

Time-reversal invariance and neutrino oscillations in a medium with a symmetric density

Speaker

Dr Juan Carlos D'Olive

16:30
