

Session Program

2-6 Dec 2014

DISCRETE 2014: Fourth Symposium on Prospects in the Physics of Discrete Symmetries

Parallel 5: Strongly coupled gauge theories

King's College London, Strand Campus, Great Hall and several lecture theatres
Strand London WC2R 2LS UK

Thursday 4 December

14:30

Parallel 5: Strongly coupled gauge theories

Session | Location: River Room

14:30–15:05

The density of states approach for the simulation of finite density quantum field theories

Speaker

Kurt Langfeld

15:05–15:40

Hadron properties using Dyson-Schwinger and Bethe-Salpeter equations

Speaker

Dr Hèlios Sanchis Alepuz

15:40–16:15

Quantum Field Theory of Magnetic Monopoles

Speaker

Prof. Arttu Rajantie

16:15
