Prospects for SUSY discovery after the LHC Run 1

Thursday, 27 August 2015 14:40 (20 minutes)

We present the prospects for SUSY searches at the LHC, e^+e^- colliders, based on our pMSSM10 analysis as presented in arXiv:1504.03260. This talk is submitted on behalf of the MasterCode collaboration. It is not clear yet who will actually give the talk.

Primary author: DOLAN, Matt (SLAC)

Co-author: HEINEMEYER, Sven (CSIC (Santander, ES))

Presenter: DOLAN, Matt (SLAC)

Session Classification: Precision SUSY/Higgs/MCTools

Track Classification: Precision Computations and Monte Carlo Tools, all areas
