Prospects for SUSY DM after the LHC Run 1

Friday, 28 August 2015 17:10 (20 minutes)

We present the prospects for the searches for DM at the LHC, future e^+e^- colliders and direct detection experiments, based on our pMSSM10 analysis as presented in arXiv:1504.03260. This talk is submitted on behalf of the MasterCode collaboration. It is not clear yet who will actually give the talk.

Primary author: DOLAN, Matthew (SLAC National Accelerator Laboratory)

Co-author: HEINEMEYER, Sven (CSIC (Santander, ES))

Presenter: DOLAN, Matthew (SLAC National Accelerator Laboratory)

Session Classification: Particle Cosmology

Track Classification: Particle Cosmology Theory and Experiment
