Barriers and Impact Session: Integrating Open Access and Wikimedia

Wednesday, 17 June 2015 16:45 (30 minutes)

Open Access and Wikimedia have a lot in common in terms of their overall goals, the technical and legal approaches and the communities involved. Many interactions thus exist between the two, but they have rarely been systematic. In this talk, I will outline a range of approaches to making these interactions more systematic, e.g. by integrating OA elements into Wikimedia workflows or policies or vice versa.
