## **Multilateration for machine calibration and deformation analysis**

*Tuesday 3 February 2015 11:30 (25 minutes)*

### **Summary**

The talk will summarize the work done at Etalon for the precision calibration of machines and the deformation analysis of technical structures. It will introduce the concept of sequential multilateration and will show a number of industrial applications.

**Presenter:** Dr SCHWENKE, Heinrich (Etalon AG)

**Session Classification:** WP1
