

Round Table Discussion

- “first” dedicated Alignment workshop
 - feedback on the workshop program / organization welcome
 - impact of the workshop on your own work?
 - how should we exchange information between collaborations in the future?
 - keep and maintain WWW-page?
 - how to give feedback of alignment experience to future detector development
 - Common Millipede C++ effort?

Round Table Discussion

- Write-up of workshop talks?
 - literature on alignment very rare
 - documentation on alignment will be very useful for future developments
 - speakers were not asked to provide a written contribution
 - “volunteers” from experiments different to speakers
 - CERN report: “yellow book”?
 - “The Alignment reference”

Round Table Discussion

- Follow up of workshop
 - this workshop was dedicated on track based alignment
 - a lot of developments currently ongoing
 - alignment (and tracking calibration) consists of more topics than track based alignment
 - workshop on hardware based alignment procedures and the combination with track information?
 - extend workshop to a workshop series
- form of future workshop series
