

# ISOLDE Workshop and Users meeting 2014 "50th Anniversary Edition"

## Tuesday 16 December 2014

### Ground States and Decays - 503/1-001 - Council Chamber (13:20 - 14:55)

-Conveners: Olof Tengblad

time	[id] title	presenter
13:20	[46] Study of Gamow Teller transitions using beta decay and charge exchange reactions	Prof. RUBIO, Berta
13:40	[45] Hyperfine structure studies of At isotopes using in-source laser spectroscopy at ISOLDE	CUBISS, James Gerald
13:55	[61] Study of multi-neutron emission in the beta-decay of $^{11}\text{Li}$	Dr DELAUNAY, Franck
14:10	[14] Study of the $^{129}\text{Sn}$ structure by beta decay: On the nature of the $3/2^+$ ground state and $1/2^+$ $315.3\text{-keV}$ level	LICA, Razvan
14:25	[37] Estimation of production rates and secondary beam intensities	VESELSKY, Martin
14:40	[42] Results from the recent 207Tl experiment using the ISOLDE Decay Station with triggerless data acquisition.	CARROLL, Robert John
