

Study and analysis of the new eclipsing PCEB system: SDSS J074548.63+263123.4

Wednesday 20 May 2015 14:00 (3h 30m)

The common-envelope process is known as one of the complicated phases in binary evolution. A lot of efforts have been dedicated to study this common-envelope stage, but the many questions related to this process are yet to be answered. If one binary survives the common-envelope, the binary will emerge as a white dwarf accompanied by low-mass main sequence star in close orbit, or often referred as the post common-envelope binary (PCEB). SDSS J074548.63+263123.4 is one of the newly found PCEBs from the Sloan Digital Sky Survey (SDSS). In this work, we aim to confirm the eclipsing nature of J074548.63+263123.4 and to determine the stellar and orbital parameters. The primary eclipse in the light curve of SDSS J0745+2631 from our follow-up observation using the ULTRASPEC instrument from the Thai National Observatory. The data in g' filter showed an evidence of the primary eclipse. In the end of 2014, J074548.63+263123.4 was observed on several filters (r' , g' and $KG5'$ filters). Those observations shown primary eclipse and SDSS J0745+2631 is confirmed to be an eclipsing binaries system.

Author: Mr HEMHA, Niwat (School of Physics, Institute of Science, Suranaree University of Technology, Nakhon Ratchasima 30000, Thailand)

Co-authors: Dr SANGUANSAK, Nuanwan (School of Physics, Institute of Science, Suranaree University of Technology, Nakhon Ratchasima 30000, Thailand); Dr IRAWATI, Puji (National Astronomical Research Institute of Thailand, Chiang Mai 50200, Thailand); Prof. MARSH, Tom (Department of Physics, University of Warwick, Coventry, CV4 7AL, United Kingdom); Prof. DHILLON, Vik (Department of Physics and Astronomy, University of Sheffield, Sheffield S3 7RH, UK)

Presenter: Mr HEMHA, Niwat (School of Physics, Institute of Science, Suranaree University of Technology, Nakhon Ratchasima 30000, Thailand)

Session Classification: Poster-1

Track Classification: Astronomy, Astrophysics, and Cosmology
