Celebrating Hundred Years of General Relativity

Wednesday, 20 May 2015 10:30 (1 hour)

This talk first discusses the history surrounding the discovery of General Relativity by Einstein in 1915. It next discusses the present status of the theory and some of its shortcomings. Finally, a view on the future of General Relativity will be presented.

Presenter: Prof. BERGSHOEFF, Eric (University of Groningen, The Netherlands)

Session Classification: Plenary
