Running slots in the last week

Slots of Running Jobs

168 Hours from 2014-10-14 to 2014-10-21 UTC

2 major issues

Saturday:

voms.cern.ch problems, ggus 109418

Panda server SSLv3 fix blocked the connection from clients

Yesterday, Today:

- HC jobs used duplicate outputfile names → most of the production sites set to test

- for now, HC is disabled, upgrade on Friday introduced a bug in the GangaCore, to be followed up

Transfer issues

- FTS bug blocked the requests of N*100 files since Friday to Monday evening
- RAL, CERN and BNL FTS updated to latest FTS3 release
- The transferring backlog was huge (250k jobs), for now, 7-day timeout is set everywhere
- Site-service and panda callback issue
 - DDM is slow due to huge number of subscribed datasets, manual interventions to complete the transfers
 - Panda lookup for transferred files reduced from 12h to 4h
- DQ2 Central Catalog:
 - 1 writer node down since yesterday
 - Another writer went down today
 - Reading is also 10x slower than usually
