

# Next plans for FCC-ee

- e+e- physics: 'every event is signal'
- qualité of FCC-ee experiments are intimately related to accelerator performance
  - available energy points
  - Luminosities
  - beam polarization and energy calibration
  - knowledge of beam other parameters (e.g. energy spread)
- we can (mostly out of LEP experience) project fairly well the experimental precisions sometimes they are vertiginously small  
ex:  $\Delta \sin^2\theta_W^{\text{eff}} = 5 \cdot 10^{-6}$ ,  $\Delta m_Z = 0.1 \text{ MeV}$   $\Delta m_W = 0.5 \text{ MeV}$   $\Delta \sigma_{Z\text{H}} / \sigma_{Z\text{H}} \sim 10^{-3}$  etc...  
→ please use these ! as Roberto emphasized, common uncertainties such as  $\Delta \alpha$  can be eliminated by combination of several observables.
- it remains that full use of precision measurements requires a considerable improvement in the theory calculations
  - for the measurements themselves (e.g. Full two loops exponentiated for the QED ISR)
  - for the interpretation; full three loop calculations for EWRCs and on inputs ( $\Delta \alpha_{\text{QED}}(m_z)$ )

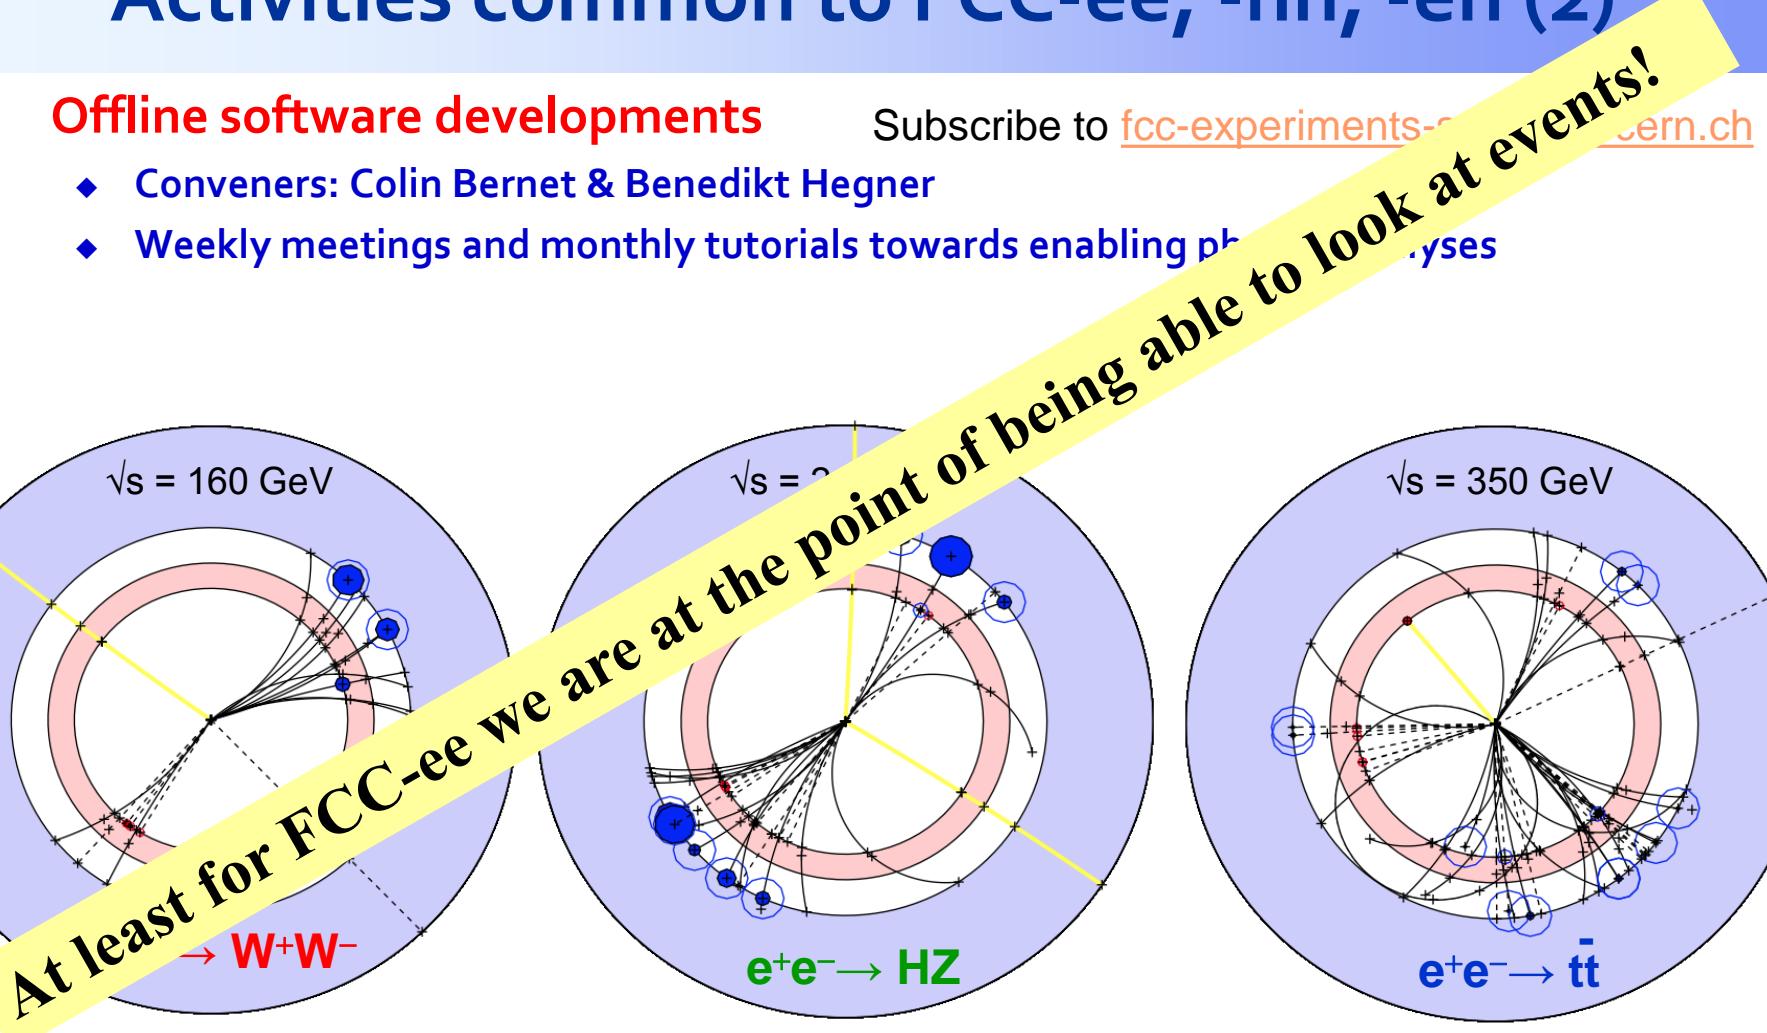

# Activities common to FCC-ee, -hh, -eh (2)

## Offline software developments

- ◆ Conveners: Colin Bernet & Benedikt Hegner
- ◆ Weekly meetings and monthly tutorials towards enabling  $p^h$ -analyses

Subscribe to [fcc-experiments-software.twiki.cern.ch](https://twiki.cern.ch/twiki/bin/viewauth/FCC/FccSoftware)

Overall twiki page : <https://twiki.cern.ch/twiki/bin/viewauth/FCC/FccSoftware>

# FCC-ee : Working groups (2)

## □ Phenomenology studies – Coordinators J. Ellis, C. Grojean

- ◆ Match theory predictions to FCC-ee experimental precisions

**QCD and  $\gamma\gamma$  Physics**  
(Joint exp/th)  
P. Skands

**Precision EW calculations**  
S. Heinemeyer

**Flavour Physics**  
(Joint exp/th)  
Jernej Kamenik

- ◆ How to discover new physics in precision measurements, in rare decays ( $Z$ ,  $W$ ,  $t$ ,  $H$ ,  $b$ ,  $c$ ,  $\tau$ , ...), and in rare or invisible processes

:

**Model Building and New Physics**  
Andreas Weiler

Synergy with FCC-hh physics  
Linear collider physics,  
LEP physics  
HF physics

- ◆ Set up the framework for global fits and understand the complementarity with other colliders (LHC, FCC-hh, in particular)

**Global Analysis, Combination, Complementarity**  
John Ellis

# FCC-ee : Working groups (1)

## □ Experimental studies – Coordinators A. Blondel, P. Janot

- ◆ Precision measurements of the Z, W, H, t properties - Rare decays – BSM physics

EW Physics (Z pole)  
R. Tenchini  
F. Piccinini

Diboson physics,  $m_W$   
R. Tenchini  
F. Piccinini

H(126) Properties  
M. Klute  
K. Peters

Top Quark Physics  
P. Azzi

QCD and  $\gamma\gamma$  Physics  
D. d'Enterria  
P. Skands

Flavour Physics  
S. Monteil  
J. Kamenik

New Physics  
M. Pierini  
C. Rogan

- ◆ Develop the necessary tools

Physics Software  
C. Bernet  
B. Hegner

Common across FCC  
Synergies with LCs

Online & Trigger  
E. Perez  
C. Leonidopoulos

Understand the experimental conditions

Exp'tal Environment  
N. Bacchetta  
Synergy with FCC-hh  
and Linear Colliders

- ◆ Set constraints on the possible detector designs to match statistical precision

Detector Designs  
A. Cattai  
G. Rolandi

Synergy with linear collider detectors:  
Collaboration with CLIC detector (CERN group)  
Several detectors possible  
lots of space for new ideas!

## On our horizon:

- we have regular VIDYO conferences on Monday 15:00 -- 17:00 (both acc. and phys.)
- regular meetings of heavy flavour (leptons or quarks) group
- workshop on precision calculations for Future Colliders  
13-14 July, CERN
- workshop on interpretation of precision SM tests  
in the fall : -- to what new physics are these sensitive  
-- extracting info from a series of different measurements
- Workshop on detectors technologies for future e+e- colliders  
(should get input from accelerator designs and from phenomenological 'interest')  
investigate requirement from precision flavour and searches

Go to FCC-ee web site <http://cern.ch/fcc-ee>  
and register to be informed

# Fill the complementarity matrix

- Physics coordination: FCC-ee, -hh, -eh coordinators + project managers
  - ◆ Ensure that all physics studies progress as one single endeavour
  - Propose physics topics to be used in the study of complementarity and synergies

*Suggest that we form (a) small working group(s) to establish the matrices*
