Athena ROOT Access (ARA) Tutorial

Monday, 15 September 2008 16:15 (1h 45m)

Athena ROOT Access (ARA) allows to directly access data in AOD format from
ROOT macros or interactive athena. The tutorials shows how this is done and how this helps to quickly and
interactively develop analysis code in ROOT/cint style or athena/python style.

Presenter: MENKE, Sven (Max-Planck-Institut fur Physik)

Session Classification: Ganga/AthenaROOTAccess/interactive athena tutorials
