B-hadron production with the ATLAS experiment

Tuesday, 28 April 2015 10:45 (20 minutes)

We present the latest results from the ATLAS experiment on B-hadron production, including the B_c^+ production cross-section measurement, observation of the $B_c(2S)$ state, branching ratio measurement of $B_c \rightarrow J/\psi D^{(*)}$ decay and extraction of fragmentation fractions f_s/f_d via reconstructed $B_s \rightarrow J/\psi \Phi$ and $B_d \rightarrow J/\psi K$ decays.
