

SAM3 ATLAS feedback

S.A. Tupputi for the ATLAS Monitoring Group

Feedback to provide

- Any show stoppers for SAM2 to SAM3 migration?
 - No
- Special steps required to announce the change to the community?
 - Within ATLAS there are suited meetings. However follow-up with sites for a while can't be ruled out

Feedback to provide

- Current profiles:
 - ATLAS_CRITICAL (for A/R)
 - ATLAS_CE_CRITICAL, ATLAS_GENERAL, ATLAS_INTERNAL, ATLAS_LCGADMIN, ATLAS_PILOT, ATLAS_PROD
- What we need keeping
 - ATLAS_CRITICAL
 - ATLAS_GENERAL (can be renamed to simply ATLAS)
 - all-inclusive container
- Will be kept but SAM3 can ignore them (needed for Nagios Boxes configuration):
 - ATLAS_INTERNAL, ATLAS_LCGADMIN, ATLAS_PILOT, ATLAS_PROD
- ATLAS_CE_CRITICAL can be dropped (its function replaced by “Show site metrics” tick)

Feedback to provide

- Needed overlap running in parallel the 4 systems SAM2/SAM3, preprod/prod?
 - 1 month
- Links from SAM2/mywlcg needed to be ported:
 - metric history in profile - absolutely crucial
 - in general the APIs provided through mywlcg/sam-pi are useful
