

Completing the technical draft (discussion)

- Latest version by Bill Johnston (Jan 30, LHC Arch list)

How to use the circuits? What about the LHC sites' last mile?

Next steps / Time

- 1Q2015: Connecting sites to the AutoGOLE, further testing
 - Checking feasibility of options from Technical Draft document
 - Proposed test connections:
 - Caltech-DEKIT (CMS)
 - Caltech-Fermilab (CMS)
 - SURFsara-Brookhaven (ATLAS)
 - Others joining? Suggestions or ideas?
- 2Q2015: Concluding experiment, drawing conclusions and decide to extend effort by adding in more sites
