CERN does dotfiles

Friday, 24 October 2014 10:39 (7 minutes)

Dotfiles are hidden files in your home folder that are used to configure tools like shell, vim or git and they tend to quickly become pretty messy. Even more when you decide to keep your refined ecosystem of dotfiles synchronized across computers. On this talk I will present my been there, done that, how I fixed it and why it can help you too even if you are happy just using Dropbox.

Summary

Presenter:  AVILES DEL MORAL, Alejandro (CERN)
