CernVM WebAPI

Ioannis Charalampidis, PH-TH, PH-SFT

What is it?

A web browser "extension" that allows javascript applications to **easily** and **securely**:

- Create & Control VMs in a user's computer
  - Interface with an application inside it

Possible use?

- Volunteering computing
- Portable development environments
- Demanding computations in javascript
- Testing scripts & apps online
- ...

Comments? Bugs? Discuss on #cernvm-webapi

Further reading (and hands-on!)

Test it live on the Virtual LHC Challenge page:

http://cern.ch/go/M7NZ *(currently only for internal use)*

The code is open!

https://github.com/wavesoft/cernvm-webapi
