## TRACKING COSMIC RAYS BY CRAYFIS GLOBAL DETECTOR

*Saturday 1 August 2015 15:30 (1 hour)***ABSTRACT:**

The purpose of this research paper is to develop efficient sites array of using CRAYFIS(Cosmic Rays Found in smart phone)which gives real time radiation weather map on temporal and spatial scales. It is suggested how a map can be prepared in terms of exact azimuth zenith and altitude angles so that the direction of the cosmic rays sources could be estimated.
