

ICRC2015

Tuesday, August 4, 2015

Poster 3 CR - Amazon Foyer (4:00 PM - 5:00 PM)

[id] title	presenter	board
[1302] Night time measurement of the UV background by EUSO-Balloon	MACKOVJAK, Simon	136
[1309] The Spanish Infrared Camera onboard the EUSO-Balloon (CNES) flight on August 24, 2014.	RODRIGUEZ FRIAS, Maria	137
[661] Ground Calibration of MAPMT and SiPM for JEM-EUSO	KARUS, Michael	138
[1074] Pattern recognition study for different levels of UV background in JEM-EUSO experiment	PASTIRČÁK, Blahoslav	139
[1075] Photoelectron counting rate measurements in the UV camera during the EUSO-BALLOON night flight	RABANAL REINA, Julio Arturo	140
[1008] Performance of the Spanish Infrared Camera onboard the EUSO-BALLOON (CNES) flight on August 24, 2014.	SÁNCHEZ, Jose Luis RODRIGUEZ FRIAS, Maria	141
[939] Expected acceptance of the KLYPVE/K-EUSO space-based mission for the observation of ultra-high energy cosmic rays	Dr FENU, Francesco SAKAKI, Naoto Dr TAKIZAWA, Yoshiyuki	142
[717] Performance of the EUSO-BALLOON optics	Mr CATALANO, camille	143
[767] The JEM-EUSO global light system laser station prototype	HUNT, Patrick	144
[925] Tests of JEM--EUSO 1st level trigger using EUSO--Balloon data	Dr FENU, Francesco	146
[590] The Expected Angular Resolution Performance of the Tilted JEM-EUSO Instrument	Dr MERNIK, Thomas	147
[393] A new design for simulation and reconstruction software for the JEM-EUSO mission	PAUL, Thomas	148
[836] K-EUSO: An improved optical system for KLYPVE Ultra-High Energy cosmic ray space telescope	Dr FUMIYOSHI, Kajino	149
[429] The Calibration of EUSO Balloon using airborne light sources mounted to a Helicopter	Dr ADAMS, James	150
[1016] Absolute calibration of the photon detector module of the EUSO-Balloon experiment and improvements for future missions	Mr MORETTO, Camille	151
[432] Calibration of the TA-EUSO Prototype Instrument	Dr ADAMS, James	152
[625] Determination of the sensitivity and the detection performances of the UV camera pixels of the EUSO-BALLOON instrument	DAGORET-CAMPAGNE, Sylvie	153
[570] JEM-EUSO observational capabilities for different UHE primaries.	Mr GUZMAN, Alejandro	154
[577] The Angular Resolution of the JEM-EUSO Mission: an updated view	Dr MERNIK, Thomas	155
[854] EUSO-TA, a ground precursor to JEM-EUSO telescope at the Telescope Array site	RICCI, Marco	156
[971] Search for significant background fluctuations in the EUSO-Balloon data	Ms JUNG, Aera	157

[979] CLOUD TOP HEIGHT ESTIMATION FROM WRF MODEL: APPLICATION TO THE INFRARED CAMERA ONBOARD EUSO-BALLOON (CNES)	SÁNCHEZ, Jose Luis RODRIGUEZ FRIAS, Maria	158
[632] EUSO-Balloon trigger efficiency in preparation of a long duration flight	BACHOLLE, Simon	159
[560] Mini-EUSO: a pathfinder for JEM-EUSO to measure Earth's UV background from the ISS.	Dr RICCI, Marco	160
[639] The Simulation of cosmic rays in EUSO--Balloon: performances of the direction and energy reconstruction	Dr FENU, Francesco	161
[1025] The Data Processor System of EUSO Balloon: in flight performance.	Dr OSTERIA, Giuseppe Dr SCOTTI, Valentina	162
[1024] Cloud Optical Depth obtained from the Infrared Camera data and the UV Flashers mounted on a helicopter flying under the EUSO-Balloon (CNES)	SÁNCHEZ, Jose Luis RODRIGUEZ FRIAS, Maria	163
[860] EUSO-Balloon: Observation and Measurement of Tracks from a Laser in a Helicopter	ESER, Johannes	164
[816] EUSO-Balloon mission to record extensive air showers from near space	WIENCKE, Lawrence	165
[889] The Weather Research and Forecasting (WRF) model contribution to the atmospheric conditions estimation during the EUSO-Balloon experiment	BERTAINA, Mario	166
[1198] The EUSO@TurLab project'	Prof. CARUSO, Rossella	167
[1155] Analysis of EUSO-Balloon data with Offline	PANICO, Beatrice	168
[1292] Implementation in OFFline of the reconstruction code of the Infrared Camera of the JEM-EUSO Space Mission.	RODRIGUEZ FRIAS, Maria	169
[890] Preliminary results from the first EUSO-Balloon flight	BERTAINA, Mario	170
[897] Towards a SiPM based fluorescence camera for JEM-EUSO	HAUNGS, Andreas	171
[611] The JEM-EUSO energy and X_{\max} reconstruction performances	Dr FENU, Francesco	172
[1283] The Atmospheric Science of JEM-EUSO	NERONOV, Andrii RODRIGUEZ FRIAS, Maria	173
[1364] A Cockcroft-Walton High-Voltage Power Supply for the EUSO Instruments	BACHOLLE, Simon	174
[682] Evaluation of scientific performance of JEM-EUSO mission with Space-X Dragon option	Dr SHINOZAKI, Kenji	175
[60] Reacceleration of electrons in supernova remnants	Prof. POHL, Martin	176
[76] Phenomenological description of young massive star clusters	Dr LAMANNA, Giovanni	177
[1133] Constraints on the extragalactic magnetic fields from the NVSS Faraday rotation measures	PSHIRKOV, Maxim	178
[143] The Ankle, the Knee and the Principle of Constant Spectral Indices in Cosmic Ray Physics	Prof. CODINO, Antonio	179
[144] The new horizon disclosed by the measurements of the chemical composition of the cosmic radiation above the ankle energy	CODINO, Antonio	180
[155] ELECTRON HEATING IN A RELATIVISTIC, WEIBEL-UNSTABLE PLASMA	KUMAR, Rahul	181
[188] Determination of source spectra of ultrahigh energy cosmic rays	ROGOVAIA, Svetlana	182
[201] Are inclined air showers from cosmic rays the most suitable to radio detection?	Mr SABOUHI, Mohammad	183
[205] A new method to determine air shower propagation direction based on radio signal patterns	Mr SABOUHI, Mohammad	184

[226] PCR energy spectrum and composition above the knee: new approach to experimental data interpretation	Prof. PETRUKHIN, Anatoly	185
[325] On the gravitational quantum states of helium atoms in the gravitational field of a cold neutron star	Prof. DALKAROV, OLEG	186
[328] The dominance of secondary nuclei in the cosmic radiation and the modulation of the nuclear species at the injection of the galactic accelerator	CODINO, Antonio	187
[359] Transport of magnetic turbulence in supernova remnants	BROSE, Robert	188
[399] Probing Efficient Cosmic-Ray Acceleration in Young Supernovae	MARCOWITH, Alexandre	189
[440] Weibel instability in anisotropically inhomogeneous plasmas	TOMITA, Sara	190
[484] Spatial Evolution of Nonresonant Instabilities in the Precursors of Young Supernova Remnant Shocks	Prof. NIEMIEC, Jacek	191
[496] Vela-X as main contributor to the electron and positron spectra at energy above 100 GeV	ROZZA, Davide	192
[515] Cosmic ray PeVatrons: where are they?	ZIRAKASHVILI, Vladimir	193
[526] A production scenario of Galactic strangelets and an estimation of their possible flux in solar neighborhood	Mr BISWAS, Sayan	194
[606] Monte Carlo simulations of proton acceleration in colliding wind binaries	GRIMALDO, Emanuele	195
[628] Adventures in Inflation And Cosmic Microwave Background - The future of the cosmos.	JOHNSON, Rashmi	196
[663] UHECR acceleration at GRB internal shocks	GLOBUS, Noemie	197
[711] Cosmic Ray Acceleration at Supernovae Occurring in Structured Environments	Dr GIACINTI, Gwenael	198
[744] Constraints of the entropic index of Tsallis statistics in the context of hadronic collisions at ultra high energies using measures of the depth of maximum of air showers	Dr DE ALMEIDA, Rogerio M.	199
[753] An Additional Component Blurring the Transition between Galactic and Extragalactic Cosmic Rays?	DELIGNY, Olivier	200
[811] Magnetic field amplification by high Alfvén Mach number shocks in partially ionized plasmas	OHIRA, Yutaka	201
[856] Constraints on acceleration of ultra high-energy cosmic rays in Fermi gamma-ray sources	Ms KAGAYA, Mika	202
[934] On galaxies as accelerators of cosmic rays	SIBATOV, Renat	203
[1005] Do Ultrahigh Energy Cosmic Rays Originate in our Galaxy?	Prof. EICHLER, David	205
[1286] Study of short-time X-ray variability of knots of Centaurus A jet	BOHDAN, Artem	207
[1359] Cosmic rays: extragalactic and Galactic	Prof. YAKOV, Istomin	208
[1146] Analysis of Background Cosmic Ray Rate in the 2010-2012 Period from the LAGO-Chacaltaya Detectors	Mr SARMIENTO-CANO, Christian	210
[1158] Constant Intensity Method in IceTop	Mr KOIRALA, Ramesh	211
[1159] Intensity of Microwave Signals Expected from Molecular Bremsstrahlung Radiation in Extensive Air Showers	AL SAMARAI, Imen DELIGNY, Olivier	212
[1169] A CORSIKA study on the influence of muon detector thresholds on the separability of primary cosmic rays at highest energies	MUELLER, Sarah	213

[1201] YAC sensitivity for measuring the light-component spectrum of primary cosmic rays at the ``knee'' energies	Prof. CHEN, Ding Prof. HUANG, Jing Dr ZHAI, L.M. Prof. SHIBATA, M. Dr KATAYOSE, Y.	214
[1212] EAS spectrum in thermal neutrons measured with PRISMA-32	PETRUKHIN, Anatoly	215
[1225] Shower reconstruction performance of the new Tibet hybrid experiment consisting of YAC-II, Tibet-III and MD arrays	Prof. CHEN, Ding Prof. HUANG, Jing Dr ZHAI, L.M. Prof. SHIBATA, M. Dr KATAYOSE, Y.	216
[1235] Simulation study on the detection of high energy electrons and gamma rays with the newly upgraded Tibet ASgamma experiment	Prof. CHEN, Ding Prof. HUANG, Jing Prof. SHIBATA, M. Dr CHEN, Xu	217
[1259] On the Combined Analysis of Muon Shower Size and Depth of Shower Maximum	VICHA, Jakub	218
[1289] Transient luminous events registered with a ground pinhole	PONCE, Epifanio	219
[1358] Measurement of the cosmic-ray nuclear composition using cherenkov detectors at Mount Chacaltaya	KATSUYA, ryoichi	220
[253] Study of Water Cherenkov muon detector parameters and performances for LHAASO	HE, Huihai	221
[885] Cloud Monitoring using Nitrogen Laser for LHAASO Experiment	ZHU, Fengrong ZHANG, Shoushan ZHANG, Yong SUN, Zhandong CAO, Zhen	222
[396] Effect of the regular galactic magnetic field on the propagation of galactic cosmic rays in the Galaxy	Dr MIYAKE, Shoko	224
[1098] Uncertainties on propagation parameters: impact on the interpretation of the positron fraction	GENOLINI, yoann	225
[1189] On the primary model to explain the relation between a rigidity-dependent spectral hardening of proton and helium spectra and a sharp knee of the all-particle spectrum.	Prof. HUANG, Jing Dr ZHANG, Ying	226
[1216] Spectral Intensities of Antiprotons and the Lifetime of Cosmic Rays in the Galaxy	Prof. COWSIK, Ramanath	227
[619] Equations of anomalous diffusion of cosmic rays	Prof. ILOLOV, Mamadsho	229
[1244] Inhomogeneous diffusion model for recent data on high-energy cosmic rays	TOMASSETTI, Nicola	231
[1245] Consistent description of leptonic and hadronic spectra in cosmic rays	TOMASSETTI, Nicola	232
[1246] Fragmentation cross-sections and model uncertainties in propagation of Galactic cosmic rays	TOMASSETTI, Nicola	233
[1138] Hadronic interactions of primary cosmic rays with the FLUKA code	MAZZIOTTA, Mario Nicola	235
[1012] Studies on Time Profiles of EAS Particles Observed with the Telescope Array Surface Detectors	Prof. NAOYA, INOUE	236
