

ICRC2015

Saturday, August 1, 2015

Poster 2 CR - Amazon Foyer (3:30 PM - 4:30 PM)

[id] title	presenter	board
[71] Feasibility study of detection of high-Z material in nuclear waste storage facilities with atmospheric muons	Dr MORI, Nicola	136
[220] An Estimate of the Live Time of Optical Measurements of Air Showers at the South Pole	BENZVI, Segev	137
[244] Development of a Front-End Electronics for YAC-III detectors of TibetASgamma experiment	KATAYOSE, Yusaku	138
[245] 'HADRON-55' COMPLEX SETUP FOR STUDY OF HADRON INTERACTIONS WITHIN THE CENTRAL PART OF COSMIC RAY EAS CORES	Dr BORISOV, Alexander	139
[324] PMT Array Nonlinearity On-line Calibration using the Photoelectron Meter for Image Air Cherenkov Telescope	ZHANG, Shoushan	140
[353] The instrumentation of the data acquisition system for the MonRA telescope	Prof. LEIGUI DE OLIVEIRA, Marcelo	141
[1329] Monitoring Environmental Water with Ground Albedo Neutrons from Cosmic Rays	Mr SCHRÖN, Martin	142
[444] Aerosol in spring-summer-autumn-winter cycles by observation at Yakutsk EAS array in 2004-2013.	PETROV, Igor	144
[454] Characteristic features of NM counts in relation to CMEs and Magnetic fields	MISHRA, RAJESH KUMAR	145
[466] Atmospheric effects on the ground-based calibration of orbital UV Telescopes	CHIRITOI, G.	146
[476] An Electric Field Detector for high-performance measurements of the electric field in the ionosphere	BADONI, Davide	147
[500] Perspectives for ultrahigh-energy particle observation based on the lunar orbital LORD space experiment	Dr RYABOV, Vladimir	148
[554] Tragaldabas: a high performance detector for the regular study of cosmic ray properties	Prof. GARZON, Juan A.	149
[622] Dedicated power supply system for silicon photomultipliers	SCHUMACHER, Johannes	150
[623] The new shower system of the Tien Shan mountain station and the goals of future cosmic ray investigations	Dr RYABOV, Vladimir	151
[659] Design and Performance of the ISS-CREAM Boronated Scintillator Detector.	Dr LINK, Jason	152
[681] The in-flight calibration of the TUS orbital detector	Dr TKACHEV, Leonid	153
[705] Photon Counting with a Fully Digital FDIRC (Focused Differential Internal Reflection Cherenkov)	MARROCCHESE, Pier Simone	154
[715] TRACKING COSMIC RAYS BY CRAYFIS GLOBAL DETECTOR	Prof. KUMAR, RAJIV	155
[760] Study on Temperature effect in DAMPE BGO ECAL	Mr WEI, Yifeng	156

[794] A Function to Describe Attenuation of Cosmic Ray Air Shower Particles in Snow	RAWLINS, Katherine	157
[813] Estimated pulse height spectrum with pulse pile-up correction for Neutron Monitor of Mexico City	GARCÍA GÍNEZ, Rocío	158
[911] Upgrade of a data acquisition system for SciBar Cosmic Ray Telescope (SciCRT) at Mt. Sierra Negra, Mexico	SASAI, Yoshinori	160
[947] New concept of very high energy cosmic ray observation by wide field-of-view telescope	Dr SHINOZAKI, Kenji	161
[984] Report on Space-Qualified Readout Electronics for the BGO Calorimeter of DAMPE Mission	FENG, Changqing	162
[997] Large scintillator EN-detector with natural boron for EAS study	Mr AMELCHAKOV, Mikhail	163
[1007] On the optimisation of the construction of a ground-based neutron monitor for galactic cosmic ray monitoring and space weather applications	SAPUNDJIEV, Danislav	164
[1009] Latest emulsion detector for cosmic ray observation: high sensitive emulsion film and high speed readout system	ROKUJO, Hiroki	165
[1061] Measuring system of the NEVOD-EAS array	Dr KHOKHLOV, Semen	166
[1163] Large-area high-altitude sampling calorimetry for cosmic rays: current potential and sensitivity	Dr IUPPA, Roberto DI SCIASCIO, giuseppe	168
[1168] The coordinate-tracking detector based on the drift chambers	PETRUKHIN, Anatoly	169
[1171] Development of optical systems for the KLYPVE experiment	Dr SHARAKIN, Sergey	170
[1204] URAGAN & TRAGALDABAS: two complementary approaches for the regular survey of cosmic rays	YASHIN, Igor GARZON, Juan A.	171
[1209] Cherenkov water calorimeter on the basis of quasispherical modules	Mr KINDIN, Victor	172
[1331] THE ARCADE PROJECT	VALORE, Laura	173
[1337] Detecting particles with cell phones: the Distributed Electronic Cosmic-ray Observatory	Prof. VANDENBROUCKE, Justin	174
[1349] Design, Fabrication and Performance of the Silicon Charge Detector for the ISS-CREAM	Dr LEE, Jik	175
[119] COSMIC RAYS: A VIEW INTO GALACTIC INTERACTIONS AND THE NEW PHYSICS	PRODANOVIC, Tijana	179
[134] The radial gradient of cosmic ray intensity in the Galaxy	Prof. ERLYKIN, Anatoly	180
[250] On the Contribution of "Fresh" Cosmic Rays to the Excesses of Secondary Particles	Prof. HU, Hongbo	181
[1060] Spectrum and anisotropy of cosmic rays in the model of relativistic nonlocal diffusion	SIBATOV, Renat	182
[1076] Theoretical uncertainties in extracting cosmic ray diffusion parameters: the boron to carbon ratio	Mr GENOLINI, Yoann	183
[401] Bayesian Approach to Galactic Cosmic Ray Propagation	MOSKALENKO, Igor	184
[403] New Calculation of Secondary Antiprotons in Cosmic Rays	MOSKALENKO, Igor	185
[548] Recent extensions to GALPROP	Dr STRONG, A.W.	186
[559] THE RELATIONSHIP BETWEEN GALACTIC COSMIC RAYS AND SOLAR WIND	Mrs IHONGO, GRACE	187
[1262] Galactic cosmic ray propagation models using Picard	REIMER, Olaf	189
[1267] Study of Cosmic-Ray Transport with the GALPROP Code	Dr PICOT-CLEMENTE, Nicolas	190

[262] Depth of Maximum Development of Extensive Air Showers by Radio Emission Data at Yakutsk EAS Array	PETROV, Igor	191
[416] EAS lateral distribution measured by the ARGO-YBJ experiment	MA, lingling	192
[838] ARGO-YBJ absolute energy scale calibration for light primaries in the multi TeV region by using the Moon shadow	MA, lingling	193
[887] All particle CR Energy spectrum by the data of the Tunka-HiSCORE prototype array.	Prof. PROSIN, Vasily	194
[910] Test for the Radio Detection of the Extensive Air Shower using the Electron Beam in Telescope Array	IKEDA, Daisuke	195
[923] Xmax reconstruction based on radio detection of air showers	BUITINK, Stijn	196
[974] Measurement of shower front with the ARGO - YBJ experiment	Ms TIAN, Zhen	197
[989] Probing the pseudorapidity region $\eta > 7$ with the ARGO - YBJ detector	IACOVACCI, michele	198
[992] A study of radio frequency spectrum emitted by high energy air showers with LOFAR	Dr ROSSETTO, Laura	199
[993] A general estimator of the primary cosmic ray energy with the ARGO-YBJ experiment	MASTROIANNI, Stefano IACOVACCI, michele	200
[1029] EAS age and energy determinations through the study of the LDF in the first few meters from the core with the ARGO-YBJ experiment	Prof. DE MITRI, Ivan	201
[1031] ARGO-YBJ measurements on the EAS-footprint stretching as an effect of the geomagnetic field	DE MITRI, Ivan	202
[1072] Reconstruction of the parameters of cosmic ray induced extensive air showers using radio detection and simulation	GATÉ, Florian	203
[338] The KASCADE Cosmic Ray Data Centre (KCDC)	Mr SCHOO, Sven	205
[580] Primary energy reconstruction from the S(500) observable recorded with the KASCADE-Grande detector	GHERGHEL-LASCU, Alexandru	206
[581] Effects of the new hadronic interaction models on the reconstruction of KASCADE-Grande observables	GHERGHEL-LASCU, Alexandru	207
[892] KASCADE-Grande energy spectrum of cosmic rays interpreted with post-LHC hadronic interaction models	BERTAINA, Mario	208
[1017] Longitudinal development of EAS muon component - comparison of data from the Muon Tracking Detector in KASCADE-Grande with model predictions	SVEN, Schoo	209
[15] Effects of the near earth thunderstorms electric field on intensity of the ground cosmic ray electron at YBJ	Dr ZHOU, Xunxiu	210
[40] Electron and thermal neutron lateral distribution functions in EAS at high altitude	SHCHEGOLEV, Oleg	211
[139] Temporal signatures of the Cherenkov light induced by extensive air showers of cosmic rays detected with the Yakutsk array	IVANOV, Anatoly	212
[142] Experimental cosmic ray studies by the sub-array of the Alborz-I array	Mrs MORTAZAVI MOGHADDAM, Saba	213
[212] Universality of the lateral and angular distributions of electrons in large extensive air showers	Dr ŚMIAŁKOWSKI, Andrzej	214
[213] Observation of intense fluxes of charged particles in association with thundercloud in Tibet	HIBINO, Kinya	215
[216] Measuring the e^+e^- Flux above 1 TeV with HAWC	HAMPEL-ARIAS, Zigfried	216
[256] Effects of thunderstorms electric field on the energy of cosmic ray electron	Prof. JIA, Huanyu	217

[257] Mass Composition of Cosmic Rays of the energy region $10^{16} - 10^{18}$ eV by data the Small Cherenkov Array at Yakutsk. Comparison with results of other installations	PETROV, Igor	218
[291] The primary energy spectrum derived from Linsley method with simulations of heavy compositions in the LAAS mini array observation	IYONO, Atsushi	219
[352] A template method for measuring the iron spectrum in cosmic rays with Cherenkov telescopes	FLEISCHHACK, Henrike	220
[455] Neutron Monitors and cosmic-ray data for solar modulation studies: 2. Modulation time series.	GHELFI, Alexandre MAURIN, David Alain DEROME, Laurent Yves Marie	221
[462] The study of cosmic rays with a wide-angle Cherenkov telescope	TIMOFEEV, Lev	222
[464] A study of the capability of the LHAASO experiment to separate primary mass groups samples	CHIAVASSA, Andrea	223
[564] Search for dark matter with LHAASO	DI SCIASCIO, giuseppe	224
[597] High energy astroparticle physics for high school students	HÜTTEN, Moritz	225
[598] Characterization of Prompt Atmospheric Lepton Fluxes	Dr DESIATI, Paolo	226
[615] "First results from Run1 of the Extreme Energy Events experiment	Dr PILO, Federico	227
[651] Revised absolute amplitude calibration of the LOPES experiment	HUEGE, Tim	228
[685] Is radar detection of extensive air showers feasible?	Dr STASIELAK, Jaroslaw	229
[766] The cosmic-ray energy spectrum above $\sim 10^{16}$ eV measured with the LOFAR Radboud Air Shower Array	THOUDAM, Satyendra	230
[768] Searching for primordial black hole evaporation signal with AMON	Dr TEŠIĆ, Gordana	231
[771] AMON: transition to real-time operations	Dr TEŠIĆ, Gordana	232
[784] ESTIMATION OF CHARM PRODUCTION CROSS SECTION IN THE FORWARD KINEMATIC CONE AT ENERGIES $E_{\text{lab}} \sim 75$ TEV ACCORDING TO THE HIGH MOUNTAIN EXPERIMENT WITH TWO-STOREY XREC	Dr BORISOV, Alexander	233
[814] Analysis of GCR Spectra and Composition Using Penetrating Particle Data from the CRIS Instrument on ACE	WIEDENBECK, M.	234
[826] Measurements, system response, and calibration of the SLAC T-510 Experiment	WISSEL, Stephanie	235
[827] Seasonal thermal neutron flux variations at high altitude	Prof. CUI, Shuwang	236
[839] Imaging and non-imaging Cherenkov hybrid reconstruction	BERGMAN, Douglas	237
[845] What number of cosmic ray events do we need to measure source catalogue correlations?	ROMERO-WOLF, Andrew WISSEL, Stephanie	238
[858] Search for EeV Protons of Galactic Origin	Dr IVANOV, Dmitri	239
[864] Barometric effect of the neutron component of cosmic rays with consideration for wind effect at the Antarctic station Mirny and station Mt. Hermon in Israel.	PUSTILNIK, Lev	240
[930] Effect of electric fields of thunderstorm atmosphere on detection of the neutron component of cosmic rays	ANTONOVA, Valentina	241
[1036] Variations of low energy gamma-rays in the atmosphere: seasonal and occurrence	Dr BALABIN, Yury	243
[1041] Cosmic ray measurements in the atmosphere at several latitudes in October, 2014	Dr MAKHMUTOV, Vladimir	244

[1055] FEATURES OF LONG PERIOD VARIATIONS OF GALACTIC COSMIC RAY INTENSITY IN RELATIONS WITH THE TURBULENCE OF THE INTERPLANETARY MAGNETIC FIELD in 1968-2014	Dr SILUSZYK, Marek	245
[660] Modelling of radio emission in the SLAC T-510 Experiment using microscopic Geant4 simulations	ZILLES, Anne	246
[691] The Effects of Three Dimensional Structures on Cosmic-Ray Propagation and Interstellar Emissions	JOHANNESSON, Gudlaugur	247
[433] Top and Bottom Counting Detectors for the ISS-CREAM experiment	Ms PARK, Jeongmin	248
[388] Investigation of cosmic-ray sources with gamma ray initiated showers	Dr URYSON, Anna	249
