

# DISCRETE '08: Symposium on Prospects in the Physics of Discrete Symmetries

Contribution ID: 127

Type: **not specified**

## Time reversal violation

*Thursday, 11 December 2008 09:05 (40 minutes)*

I will discuss issues related to time reversal invariance and non-invariance in particle physics and beyond. I will examine how the match of CP violation and T violation that occurs under CPT symmetry manifests itself somewhat differently in K and in B decays.
