

Experiment computing models at HL-LHC (1/2)

Sunday 12 April 2015 09:45 (50 minutes)

The goal of this session is to understand what are the main challenges up to the Run3 and HL-LHC timescale, the projections on the resource requirements, the limitations to overcome in the current computing models and the expectations of the experiments on the role of WLCG.

Session Classification: Computing at the HL-LHC timescale
