Numerical Evaluation of Feynman Integrals by a Direct Computation Method

Wednesday, November 5, 2008 3:15 PM (25 minutes)

We apply a 'Direct Computation Method', which is purely numerical, to evaluate Feynman integrals. This method is based on the combination of an efficient numerical integration and an efficient extrapolation strategy. In addition, high-precision arithmetic and parallelization techniques can be used if required. We present our recent progress in the development of this method and show test results such as for one-loop 5-point and two-loop 3-point integrals.

Author: Dr YUASA, Fukuko (KEK)

Co-authors: Prof. DE DONCKER, Elise (Western Michigan University); Dr FUJIMOTO, Junpei (KEK); Mr HAMAGUCHI, Nobuyuki (Hitachi, Ltd.); Dr ISHIKAWA, Tadashi (KEK); Prof. SHIMIZU, Yoshimitsu (The Graduate University for Advanced Studies, Sokendai)

Presenter: Dr YUASA, Fukuko (KEK)

Session Classification: Methodology of Computations in Theoretical Physics - Session 1

Track Classification: 3. Computation in Theoretical Physics
