Testing dCache and IPv6

Tuesday, March 24, 2015 4:40 PM (15 minutes)

A view back on testing IPv6 and different versions of dCache as it has evolved from 2.6 to 2.12 and barely-working to well working.

Summary

A few years back I got tasked to testing dCache and IPv6 since “somebody” needed to do it and noone else was brave enough to try it.

Every version of dCache has then improved significantly for each new release, reaching maturity at the brand new 2.12.
