

"ROOT Turns 20" Users' Workshop

Tuesday, September 15, 2015 - Friday, September 18, 2015

Hotel Schweizerhof, Saas-Fee

Scientific Program

The focus for this workshop is on user feedback and discussions with the developers, to shape the future of ROOT.

Special guests this year are Bjarne Stroustrup, the inventor of C++, presenting how to write good, modern C++; Wolfgang Huber on data processing with R and Bioconductor; and Electronic Arts on large-scale data analysis for instance for game data!

Please submit an abstract on a topic you think could be interesting for ROOT users or developers.
