

2nd RD51 Collaboration Meeting

Tuesday, 14 October 2008

WG1: Technological Aspects and Developments of New Detector Structures - Amphitheatre (09:00 - 12:30)

time	[id] title	presenter
09:00	[37] WG1 Geometry and Interactions	COLAS, Paul
09:15	[38] New results on THGEM operation	BRESKIN, Amos
09:35	[46] Practical limits to the size of MPGDs	DE OLIVEIRA, Rui
09:50	[40] Large area Micromegas	WOTSCHACK, Joerg
10:10	[41] Development of Large area GEM detector prototype	DUARTE PINTO, Serge
10:30	Coffee break	
11:00	[42] Resistive coatings for resolution and anti-spark protection	COLAS, Paul
11:15	[43] Kobe activities on new structures	OCHI, Atsuhiko
11:30	[68] Status of the MHSPs performance: recent technological developments and future goals	VELOSO, Joao
11:45	[44] Cylindrical GEM development	BENCIVENNI, Giovanni
12:00	[45] Flexible Micromegas	AUNE, Stephan
12:15	[47] Portable detectors
