

2nd RD51 Collaboration Meeting

Tuesday, October 14, 2008

WG1: Technological Aspects and Developments of New Detector Structures - Amphitheatre (9:00 AM - 12:30 PM)

time	[id] title	presenter
9:00 AM	[37] WG1 Geometry and Interactions	COLAS, Paul
9:15 AM	[38] New results on THGEM operation	BRESKIN, Amos
9:35 AM	[46] Practical limits to the size of MPGDs	DE OLIVEIRA, Rui
9:50 AM	[40] Large area Micromegas	WOTSCHACK, Joerg
10:10 AM	[41] Development of Large area GEM detector prototype	DUARTE PINTO, Serge
10:30 AM	Coffee break	
11:00 AM	[42] Resistive coatings for resolution and anti-spark protection	COLAS, Paul
11:15 AM	[43] Kobe activities on new structures	OCHI, Atsuhiko
11:30 AM	[68] Status of the MHSPs performance: recent technological developments and future goals	VELOSO, Joao
11:45 AM	[44] Cylindrical GEM development	BENCIVENNI, Giovanni
12:00 PM	[45] Flexible Micromegas	AUNE, Stephan
12:15 PM	[47] Portable detectors
