## Low Scale Unification @ LHC

Thursday, 14 April 2016 19:00 (10 minutes)

The Talk is based on

- P. Fileviez Perez, S. Ohmer and H. H. Patel,  
“Minimal Theory for Lepto-Baryons”,  
Phys.Lett. B735 (2014) 283-287,  
[arXiv: 1403.8029]
- P. Fileviez Perez and S. Ohmer,  
“Low Scale Unification of Gauge Interactions”,  
Phys.Rev. D90 (2014) 3, 037701,  
[arXiv: 1405.1199]
- S. Ohmer and H. H. Patel,  
“Leptobaryons as Majorana Dark Matter”,  
Phys.Rev. D92 (2015) 5, 055020,  
[arXiv: 1506.00954]

### Summary

I will discuss a new class of models where the global baryonic and leptonic symmetries of the Standard Model are promoted to gauge symmetries. Anomaly cancellation requires new fermions called “leptobaryons”. I demonstrate how these new degrees of freedom can allow for the possibility of low scale unification, and I will show how the LHC can search for this class of models and draw connections to dark matter searches.

**Primary author:** OHMER, Sebastian (Max-Planck-Institut fuer Kernphysik (MPIK), Heidelberg)

**Co-authors:** PATEL, Hiren (Max Planck Institute); FILEVIEZ PEREZ, Pavel (MPIK)

**Presenter:** OHMER, Sebastian (Max-Planck-Institut fuer Kernphysik (MPIK), Heidelberg)
