

MW Package Reporter Development, Status and Plans

Lionel Cons
IT/SDC

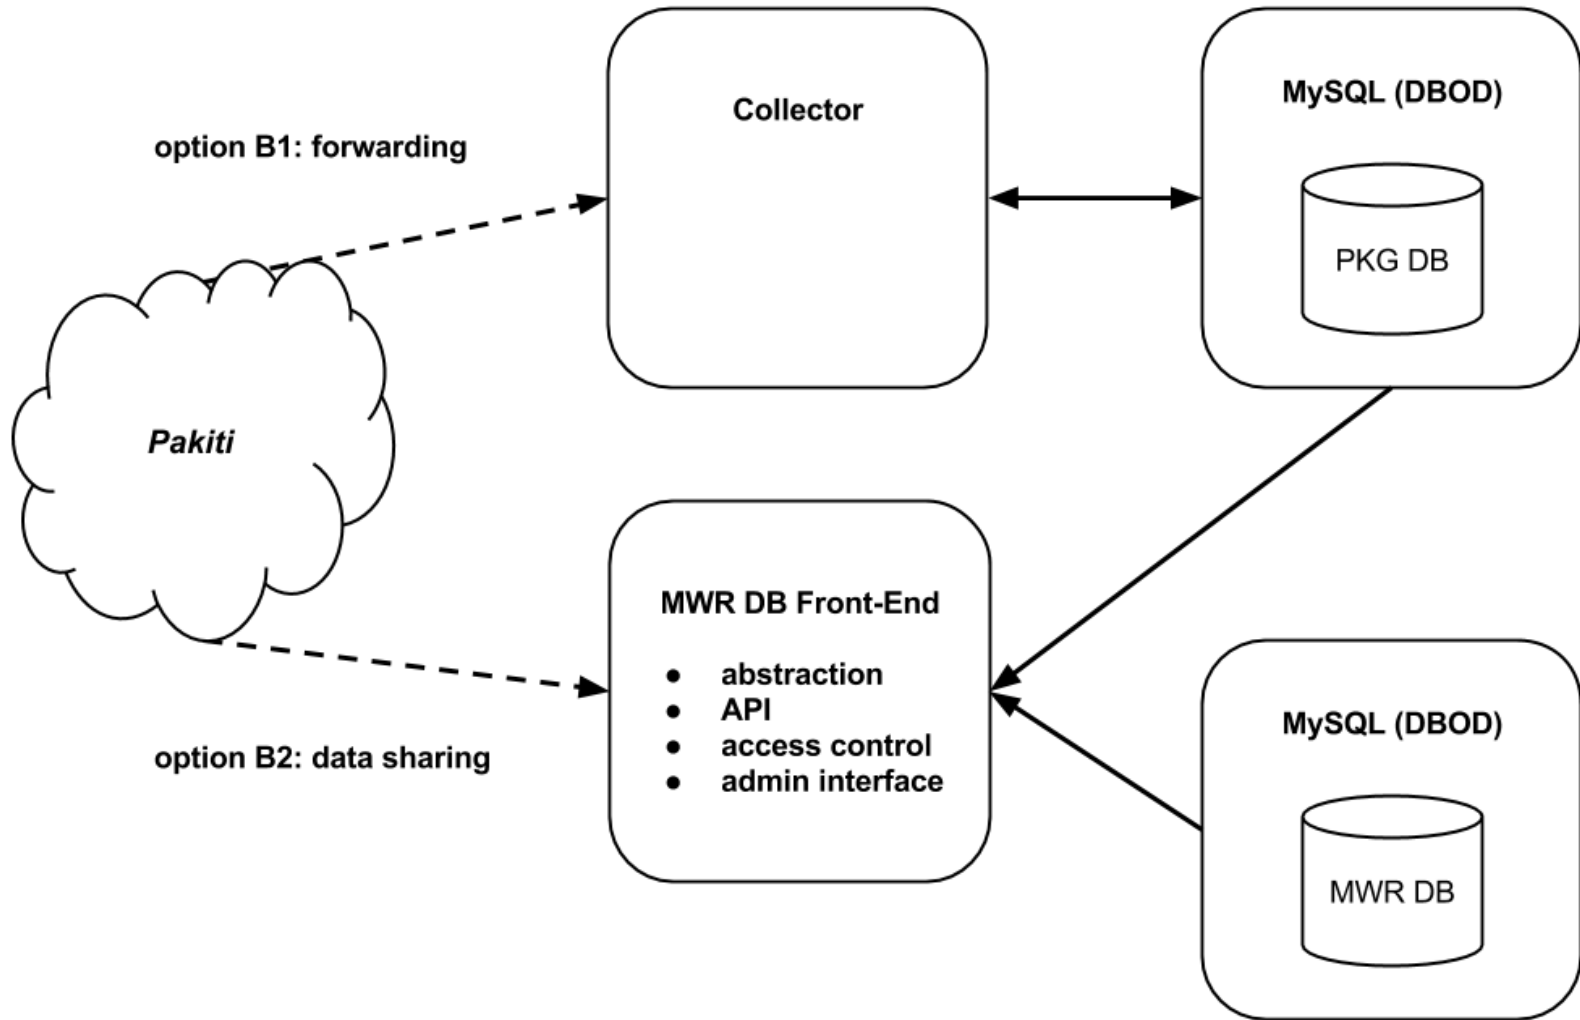

19 November 2014

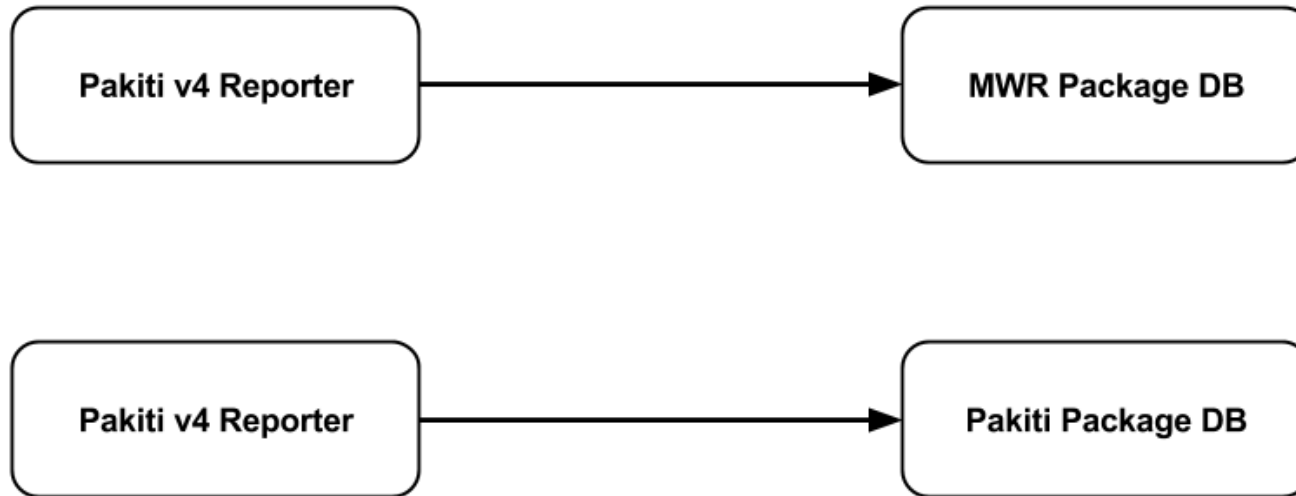

Pakiti Interoperability (A)

Pakiti Interoperability (B)

Pakiti Interoperability (C)

- same reporter code
- two completely separated databases
- no data sharing between these use cases

Pakiti Interoperability

- share code as much as possible
- do not share collected data at all
- single reporter to come from EPEL
- different reporter configurations:
 - to report to EGI security
 - to report to MW readiness
- sites control where they report to

Plans

- reporter to be extended to cover the new use case (direct Pakiti submission)
- reporter to be submitted to EPEL
- work on general purpose package database to continue
- work on MW readiness reporting to start
