

## FCC-he: Double Higgs

- Double Higgs production in 4b final states in 50 TeV proton and 60 GeV electron collision at FCC-he
- Using MG5 + pythia-pgs + delphes
- Modified CMS Delphes Card: forward jet  $|\eta| < 7$ , bTag  $|\eta| < 5$
- Comparing "particle" and "detector" level distributions and cut-flows
- Cut-flows:
  - No Cut
  - $p_T > 20$  GeV, 4b + 1 jet
  - $\eta_{fwd-jet} > 3.8$
  - $MET > 30$ ,  $\Delta\phi_{MET-1djet} > 0.4$ ,  $\Delta\phi_{MET-subljet} > 0.4$
  - $90 < M_{jj} < 125$
  - Lepton rejection  $p_T > 10$  GeV
  - $M_{4b} > 250$  GeV
- $L = 10 ab^{-1}$
