

## Status and outlook of the HEP Network

*Monday, 23 March 2009 18:10 (20 minutes)*

I will review the status, outlook recent technology trends and state of the art developments in the major networks serving the high energy physics community in the LHC era.

I will also cover the progress in reducing or closing the Digital Divide separating scientists in several world regions from the mainstream, from the perspective of the ICFA Standing Committee on Inter-regional Connectivity.

### **Presentation type (oral | poster)**

oral

**Author:** Prof. NEWMAN, Harvey (Caltech)

**Presenter:** Prof. NEWMAN, Harvey (Caltech)

**Session Classification:** Grid Middleware and Networking Technologies

**Track Classification:** Grid Middleware and Networking Technologies
