

Quark Matter 2015 - XXV International Conference on Ultrarelativistic Nucleus-Nucleus Collisions

Sunday 27 September 2015 - Saturday 3 October 2015

Kobe, Fashion Mart, Japan

Scientific Topics

QCD at High Temperature

Baryon Rich QCD Matter

QGP in Small Systems

Initial State Physics and Approach to Equilibrium

Jets and High pT Hadrons

Open Heavy Flavors and Strangeness

Quarkonia

Electromagnetic Probes

Collective Dynamics

Correlations and Fluctuations

Quark Matter in Astrophysics

Relations to Other Strongly Interacting Systems

New Theoretical Developments

Future Experimental Facilities, Upgrades, and Instrumentation
